

Preliminary California Commercial Landings of Minor Nearshore Rockfish
Species and State-Managed Nearshore Species for 2004 and 2005^{1,2}

Minor Nearshore Rockfish Species

PacFIN Best Estimate (mt) of Commercial Landings for Minor Nearshore Rockfish (NS RF) Species, 2004				
Area	Group	HG	Landings (mt)	% of HG
North of 40° 10' N	Black rockfish	123	57	46
	Minor nearshore rockfish north	14.8	7	47
South of 40° 10' N	Black rockfish	17	5	29
	Minor nearshore rockfish south	97	89	92
	Shallow nearshore rockfish	38.8	41	106
	Deeper nearshore rockfish	37.2	43	116
	Scorpionfish	21	5	24

PacFIN Best Estimate (mt) of Commercial Landings for Minor Nearshore Rockfish (NS RF) Species, 2005				
Area	Group	HG	Landings (mt)	% of HG
North of 40° 10' N	Black rockfish	116	57	49
	Minor nearshore rockfish north	14.8	27	182
South of 40° 10' N	Black rockfish	25	3	12
	Minor nearshore rockfish south ³	97	82	84
	Shallow nearshore rockfish		41	
	Deeper nearshore rockfish		37	
	Scorpionfish		4	

¹ Preliminary data from 1/3/06 extract

² Includes all gear types for both limited entry and open access vessels combined

³ There were no sub-group harvest guidelines in 2005

State Managed Nearshore Species

Estimates of Statewide Commercial Landings (pounds) for State Managed Nearshore Species, 2004 and 2005				
Year	Species	TAC	Landings (pounds)	% of TAC
2004	Cabazon	75,600	108,881	144
	Greenlings	3,400	4,519	133
	Sheephead	75,200	87,213	116
2005	Cabazon	59,300	68,863	116
	Greenlings	3,400	3,854	113
	Sheephead	75,200	77,480	103
